

*Education For The New Age
And The Awakening of Humanity*

An Evening with Joseph

Eyes of Learning | Friday 09 June 2017

This presentation will explore the *Education* necessary to enter into the frequencies that are now visiting the Earth plane in this new century. The program includes a treatment of the Spiritual Laws and Universal precepts that govern all lifetimes – including the laws of *Rebirth, Karma and Attraction* – as well as a discussion and analysis of extra terrestrial life forms on other celestial planes and bodies and their role in human development here.

A substantive difference is now required for us and for our children, and an *Education* specifically designed for this *New Age* is imperative if we are to survive the threats to our environment, and perhaps avert yet another world war. Through a metaphysical analysis of government, capitalism, culture, religion, the media, nuclear energy and accepted principles of standard education, we will set the framework for a radical new approach to learning – and living.

With this advantage, we will then be guided through these changing trends, and the evolution of higher consciousness to come, with peace, wisdom, prosperity and harmony, as opposed to chaos, violence, poverty and planetary destruction.

A Question and Answer session will follow the Presentation.
