

***“Out of the Mouths of Babes – Unadulterated Accounts  
of Children’s Memories of Past Lives”***

***FRIDAY MAY 15, 2015 8.00 PM***

An Evening with Joseph

=====

This presentation will offer case studies of numerous worldwide reports over the last half century of young children who have made astonishing claims of detailed and evocative past life memories.

The discussion will also examine the intersection of Reincarnation and Biology, where birthmarks and birth defects of the child correlate to the previous personality they claim to have once been.

The patterns and the connections are surprising, fascinating and persuasive and present a convincing case for the Reincarnation of the deceased personality.

A discussion of the general precepts of Reincarnation and Life on The Other Side will set the stage for the evidence presented here in making a compelling argument that supports both this theory, and the in-between-life implications of these claims.

A Question and Answer Session will follow the Presentation.
